

Hours of Operation

OANDA's hours of operation coincide with the global financial markets. Trading is available from Sunday approximately 5 p.m. to Friday 5 p.m. (New York time).

If you decide to leave trades open over the weekend:

- You cannot close existing positions or open new positions when markets are closed (but you can place or modify limit, stop loss, take profit and trailing stop orders).
- Spreads (the difference between the bid price and the ask price) typically widen at 4:00 p.m. Friday, to reflect decreased liquidity in the global markets. These widened spreads could trigger stop-loss orders or margin closeouts.
- Market prices may significantly change or "gap" when trading resumes on Sunday. This change could trigger limit orders, which are executed at the current market rate. For example, if the market rate moves against you, a stop-loss order may be closed at a rate different from your stop-loss rate, resulting in additional losses.

Ensure that you maintain sufficient margin in your fxTrade account at all times to avoid a margin closeout. To reduce the risk of a margin closeout, reduce or close your overall positions or add more funds to your fxTrade account. To prevent unwanted order execution, consider widening your take-profits, stop-losses or trailing-stops prior to the weekend.

Listed below are specific instruments with trading hours that differ from those noted above.

* Where exchanges' market hours are affected by daylight saving, British summer time, etc., the local exchange times represent OANDA's trading hours.

Trading hours are based on when underlying futures reference markets are open. OANDA CFDs will not be available for trading during holidays in which reference markets are closed.

OANDA prices are calculated from the theoretical spot prices derived from underlying futures.

Please be advised that CFD products are not available to residents of the United States of America or its territories.
